Advanced Dual-Mode MagicWheel

1# Infinite Free-Scroll Mode | Effortless Browsing

Ideal for long documents, code, and web pages.

Equipped with a standard mechanical scroll wheel, this mode redefines the traditional middle button with a pressure-sensitive MagicWheel for intuitive free scrolling.

- Single Click: Enable incremental step scrolling.
- Press and hold the MagicWheel, then adjust pressure to control continuous scrolling speed: lighter pressure for slower scrolling, heavier pressure for faster scrolling.
- Toggle the MagicWheel forward or backward to reverse scrolling direction.

Note: In this mode, the original middle button function is switched to the combination of left + right button press.

2# Soft Middle-Key Mode | Say Goodbye to Operational Fatigue

Ideal for CAD, 3D Modeling & Graphic Designers.

This mode retains all core functionality of a standard mouse, while featuring a lighter, lower-resistance middle click. The middle-key feel becomes noticeably softest when Infinite Free-Scroll Speed is set to Ultra-Fast level.

Featuring a bespoke structural design and proprietary patented technology, it effectively alleviates operational fatigue for users who rely heavily on the middle button. (e.g., rotating views in SolidWorks, Blender, or Maya).

Extra Convenient functions in Mode 1#

"Modes Indicator" flash one time for mode 1#, flash twice for 2#.

Press & Hold Button 5 +

- MagicWheel 3.....Horizontal Scrolling
- Button 1Copy
- Button 2Paste
- Buttons 1+2Cut

Package Contents

1	the CAP11 Mouse & Receiver	1set
2	USB A-to-C Charging Cable	1pc
3	User Manual	1pc
4	Portable Bag	1pc

System Requirements

Compatible with Windows / MacOS / iOS / Android / Linux / Harmony OS etc. with available USB-A port and/or with Bluetooth function.

Features (Mouse & Laser Presenter 2 in 1)

- Patented Capacitive Press-to-Scroll Technology
- Intuitive Pressure-Sensitive Infinite Free-Scroll
- Advanced Dual-Mode MagicWheel Technology

Specifications

- Operating Voltage: 5.0±0.5V
- Operating Current: <6mA
- Li-Battery Capacity: 180mAh
- USB 2.0 Full Speed
- Charging Interface: USB-C Port
- Fully Charging Time: around 30mins
- BT Low Energy 5.2v
- 2.4G Frequency: 2402-2480MHz
- Working Distance: Around 10m(Open Space)
- Polling Rate: USB 500Hz, 2.4G 250Hz, Bluetooth 133Hz
- Tracking Speed: 40ips
- Acceleration: up to 10g
- Dimension: L60mm * W45 * H13.8mm
- Product Weight: 42.6g(w/receiver)

How to Connect & Use

- USB Mode: Toggle the button 6 to switch to USB mode and then connect cable for wired USB operation.

2.4G Mode: Toggle the button 6 to switch to 2.4G mode, then insert the 2.4G nano receiver into your PC's USB-A port to connect for instant use.

Bluetooth Mode: First, toggle the button 6 to switch to BT1 or BT2 mode, enable Bluetooth search on your computer. Next, long-press the button 6 until the corresponding blue indicator flashes---this confirms Bluetooth pairing mode is activated, Once paired with your PC, the device is ready for use.

Pairing Name: Capacmouse11 5.0 for BT1 Capacmouse11 5.2 for BT2

DPI---Cursor Movement Speed Switch

Press the button 7 to cycle through 4 cursor speed levels. The Mode & Status Indicator flashes 1, 2, 3, or 4 times, corresponding to 1000 / 2000 / 3000 / 4000 DPI respectively.

Infinite Free-Scroll Speed Level Switch

Long Press the button 8 to cycle through 4 levels of free-scroll speed. The Mode & Status Indicator will flash 1, 2, 3 or 4 times, corresponding to Low, Standard, Fast and Ultra-Fast scrolling speed level respectively.

[The scroll wheel delivers its lightest pressing feel when scrolling at Ultra-Fast level.]

Distinctive Horizontal Scrolling Function

Press & hold the backwrad button 5 first, then operate the MagicWheel to active two horizontal scrolling modes:

Method 1: Scroll the MagicWheel up or down manually.

Method 2: (Recommended) Single-click or press and hold the MagicWheel for pressure-sensitive scrolling. Scroll the MagicWheel slightly forward or backward to change the scrolling direction horizontally.

Trouble Shooting

In case the mouse doesn't work well sometimes, maybe it's caused by low power condition, so please recharge your mouse and/or switch it off & on again.
